

GLOBAL AI ECOSYSTEM ANALYTICS PLATFORM

AI Pulse 2030

An End-to-End Data Analytics Project

Excel

SQL

Power BI

GitHub

Prepared By

Aditya Warudkar

B.Tech – Computer Science & Engineering | RTM Nagpur University (Batch 2026)

Project Overview

About the Project

AI Pulse 2030 is an end-to-end Business Intelligence project developed to analyze the rapidly evolving global AI ecosystem. It integrates AI tools, GitHub repositories, student adoption patterns, workforce trends, and industry insights into interactive dashboards for data-driven decision-making.

The project demonstrates the complete analytics lifecycle — from raw data preparation to executive-level business intelligence reporting.

Objectives

Analyze the global AI ecosystem

Evaluate GitHub repository performance

Understand student AI adoption

Explore future workforce trends

Build executive dashboards for strategic insights

Business Problem

Why This Project?

The rapid growth of Artificial Intelligence has created massive datasets across education, open-source development, and industries.

Organizations require unified intelligence across five key dimensions:

AI Market Intelligence

Track adoption trends across tools and industries

GitHub Ecosystem Analysis

Evaluate open-source repository performance

Student AI Adoption Insights

Understand learning behavior and dependency

Workforce Demand Forecasting

Predict future job roles and automation risk

Executive Dashboards

Enable fast, confident decision-making

AI Pulse 2030 consolidates these five perspectives into one unified analytics platform.

Technology Stack

Microsoft Excel

- Data Cleaning
- Pivot Tables
- Dashboard
- Data Validation

SQL

- Data Cleaning
- Data Transformation
- Aggregation
- Analytical Queries

Power BI

- Data Modeling
- Power Query
- DAX
- Interactive Dashboards

GitHub

- Version Control
- Documentation
- Portfolio Presentation

Skills Demonstrated:

Data Cleaning

ETL

SQL

DAX

Dashboard Design

Data Visualization

Dataset Overview

The project combines multiple datasets covering different dimensions of the AI ecosystem.

50,000

Students

199

AI Tools

20

Future Job Roles

10

Countries

246K

GitHub Stars

27K

GitHub Forks

Major Domains

AI Tools

GitHub Analytics

Student Adoption

Workforce Analytics

Countries

Industries

Programming Languages

Project Workflow

A structured, repeatable pipeline — from unstructured raw data to executive-ready business intelligence.

Raw & Structured Data

Transformation Layer

Analytical Modeling

Visual Storytelling

Executive Dashboard

Dashboard Includes

- Executive KPIs
- Country Analysis
- Industry Insights
- Salary Analysis
- AI Tool Distribution
- Future Demand
- GitHub Metrics

BUSINESS VALUE

Provides a high-level overview of the global AI ecosystem to support executive decision-making.

AI Tools Intelligence Dashboard

Dashboard Includes

- AI Tool Categories
- Programming Languages
- Open Source Analysis
- Country Distribution
- GitHub Popularity
- Future Demand Score

KEY BUSINESS INSIGHT

Analyze technology trends and identify the most influential AI tools in the ecosystem.

Student AI Adoption Dashboard

Dashboard Includes

- AI Usage Hours
- GPA Analysis
- Study Hours
- AI Dependency
- Prompt Engineering Skills
- Paid Subscription Analysis
- Major-wise AI Adoption

BUSINESS VALUE

Understand how students are integrating AI into education and identify learning behavior patterns.

GitHub Analytics Dashboard

Dashboard Includes

- GitHub Stars
- GitHub Forks
- Primary Languages
- Open Source Distribution
- Repository Popularity
- Category Analysis

BUSINESS VALUE

Measure developer engagement and evaluate repository popularity across the AI ecosystem.

Future Workforce Dashboard

Dashboard Includes

- Hiring Trends
- Automation Risk
- Salary Analysis
- Workforce Demand
- Company Size
- Education Level
- Job Satisfaction

BUSINESS VALUE

Forecast future workforce requirements and identify industries most affected by AI transformation.

Excel Dashboard

Dashboard Includes

- Initial Data Exploration
- Pivot Analysis
- KPI Validation
- Trend Analysis

PURPOSE

Provides quick exploratory insights before advanced Power BI visualization.

Key Business Insights

GitHub repositories with higher stars demonstrate stronger developer adoption.

Open-source AI projects dominate the ecosystem.

Student AI usage continues to increase across academic disciplines.

AI demand is expected to grow significantly across multiple industries.

Programming languages such as Python remain central to AI development.

Interactive dashboards enable faster and more informed business decisions.

Challenges & Learnings

Challenges

- Cleaning multiple datasets
- Handling missing values
- Data transformation
- Building relationships
- DAX optimization
- Dashboard performance
- UI consistency

Key Learnings

- Power BI Dashboard Design
- Advanced DAX
- SQL Analytics
- Excel Automation
- Data Storytelling
- Business Intelligence
- GitHub Project Documentation

Aditya Warudkar

Bachelor of Technology (B.Tech)

Computer Science & Engineering (CSE)

RTM Nagpur University (RTMNU) — Batch of 2026

Currently seeking Data Analyst Internship and Full-Time opportunities.

Career Objective

Aspiring Data Analyst with expertise in Excel, SQL, Power BI, and Business Intelligence. Passionate about transforming raw data into actionable insights through interactive dashboards and analytical storytelling.

Technical Skills

Microsoft Excel

SQL

Power BI

DAX

Power Query

Data Cleaning

Data Visualization

Dashboard Design

Git & GitHub

Thank You
